S-FORCE LINE

DH2

**MOTION
TECHNOLOGY
SELECTORIZED**

HAMMER FORCE PRO

The S-FORCE Series is engineered for commercial facilities that require both training efficiency and mechanical stability. With selectorized weight stacks, guided movement arms, and 2.5 kg incremental weight options, the series delivers a smooth training feel with easy load selection and finer progression. Built for consistent performance and everyday durability, SM5000 provides a practical strength solution for modern gyms and fitness clubs.

THE ROAD TO CONTROLLED STRENGTH STARTS HERE.

- **S-FORCE Series – Built for controlled strength performance.**
- **Designed to combine the convenience of selectorized weight stacks with a guided motion structure inspired by free-weight training.**
- **The linked movement arms provide a stable and consistent training path, while 2.5 kg add-on weights allow finer load progression for more precise training control.**

Leg Curl

SM5001

Dimension: 1675*1095*1330 mm
Weight: 240 kg
Weight Stack: 95 kg

The DHZ SM5001 Prone Leg Curl is designed for controlled hamstring training in commercial strength areas. The separated hip and chest pad layout helps support a stable prone position, while the adjustable start range allows users to select a comfortable training angle based on individual mobility and exercise preference.

Leg Extension

SM5002

Dimension: 1250*1130*1445 mm
Weight: 300 kg
Weight Stack: 138 kg

The DHZ SM5002 Leg Extension provides focused quadriceps training with a clear and accessible adjustment layout. Key settings can be reached from the seated position, and the adjustable start range helps users set a suitable movement arc for controlled leg extension training.

Seated Leg Press

SM5003

Dimension: 2000*1085*1540 mm
Weight: 385 kg
Weight Stack: 138 kg

The DHZ SM5003 Seated Leg Press is built for lower-body pressing training with stable body positioning and a smooth guided movement. The rail-based structure supports consistent motion, while the angled pressing path helps create a comfortable and secure training experience for commercial gym users.

Pectoral Fly

SM5004

Dimension: 1310*1200*2050 mm
Weight: 298 kg
Weight Stack: 138 kg

The DHZ SM5004 Pectoral Fly is developed for chest isolation training with adjustable arm positioning and stable user support. The integrated foot assist bar helps users enter and stabilize during exercise, while the adjustable start mechanism allows different range-of-motion settings for varied training needs.

STEEL-CORD REINFORCED BELT DRIVE

- **Belt drive system applied across the S-FORCE Series.**
- **Embedded steel cords ensure high tensile strength and durability.**
- **Smooth, quiet transmission creates a more responsive training feel.**
- **Clean drive structure supports reliable performance in commercial use.**

Lateral Raise

SM5005

Dimension: 1095*930*1330 mm
Weight: 260 kg
Weight Stack: 95 kg

The DHZ SM5005 Lateral Raise supports focused shoulder training with pad and handle positions designed around controlled arm elevation. Pivoting handles help accommodate different user builds, while the guided movement path encourages stable and consistent lateral raise execution.

Shoulder Press

SM5006

Dimension: 1510*1465*1540 mm
Weight: 258 kg
Weight Stack: 95 kg

The DHZ SM5006 Shoulder Press is designed for seated overhead pressing with a stable support structure and user-friendly adjustment. The seat position helps define the training range, while multiple grip options allow users to choose a pressing position that feels natural and controlled.

Pectoral Fly/Rear Deltoid

SM5007

Dimension: 1250*1435*2050 mm
Weight: 295 kg
Weight Stack: 138 kg

The DHZ SM5007 Pec Fly / Rear Delt combines two upper-body isolation movements in one compact station. Pivoting arms and carefully positioned handles support both chest fly and rear deltoid training, reducing the need for complex adjustments between exercises.

Chest Press

SM5008

Dimension: 1480*1080*1540 mm
Weight: 286 kg
Weight Stack: 138 kg

The DHZ SM5008 Chest Press provides guided pressing movement for controlled chest training. The adjustable pressing arm allows multiple start positions, helping users select a suitable range of motion while maintaining a stable seated posture throughout the exercise.

2.5 KG INCREMENT WEIGHT

- **2.5 kg increment weights on each machine.**
- **Select weight for finer load progression.**
- **Supports warm-up sets, controlled training, and different strength levels.**
- **Built-in adjustment keeps load selection simple, clear, and efficient.**

Assist Dip Chin

SM5009

Dimension: 1285*1125*2215 mm
Weight: 325 kg
Weight Stack: 82 kg

The DHZ SM5009 Assist Dip Chin is designed to support assisted dip and chin-up training while also allowing progression toward bodyweight movement. The foldable knee pad provides flexible training options, and multi-position handles support different grip choices and exercise variations.

Standing Calf

SM5010

Dimension: 1490*1145*1620 mm
Weight: 340 kg
Weight Stack: 195 kg

The DHZ SM5010 Standing Calf is built for standing calf raise training with adjustable shoulder pad height and stable foot support. The contoured foot platform helps users maintain secure positioning while allowing a natural ankle movement range during repeated calf raise exercise.

Hip and Glute

SM5011

Dimension: 1650*995*1770 mm
Weight: 340 kg
Weight Stack: 138 kg

The DHZ SM5011 Hip and Glute provides targeted lower-body training for hip and glute activation. Its bidirectional resistance structure supports controlled movement in both directions, helping users perform focused hip extension and glute training with stable body positioning.

Lat Pulldown

SM5012

Dimension: 1390*1235*2260 mm
Weight: 270 kg
Weight Stack: 138 kg

The DHZ SM5012 Lat Pulldown is designed for upper-back training with adjustable thigh pads for improved stability and comfort. The angled-end straight bar supports a natural hand and wrist position, helping users maintain better control during pulldown movements.

2.5 KG
INCREMENT 
WEIGHT

**LEG
EXTENSION**

Abdominal Crunch

SM5014

Dimension: 1565*930*1330 mm
Weight: 248 kg
Weight Stack: 95 kg

The DHZ SM5014 Abdominal Crunch supports controlled abdominal training through a guided crunch movement path. The counter-balanced work arm helps reduce excessive starting resistance, while dual foot supports provide stable lower-body positioning without complicated setup.

Hip Abduction

SM5021

Dimension: 1550*1550*1330 mm
Weight: 280 kg
Weight Stack: 138 kg

The DHZ SM5021L Hip Abduction is developed for targeted outer-thigh and hip abduction training. The adjustable start mechanism allows incremental positioning, while the knee pads and dual foot placements help support the legs comfortably throughout the movement.

Hip Adduction

SM5022

Dimension: 1550*1550*1330 mm
Weight: 280 kg
Weight Stack: 138 kg

The DHZ SM5022L Hip Adduction provides controlled inner-thigh training with an accessible start-position adjustment for easier entry and exit. The front-mounted weight stack also creates a more enclosed training position, helping users feel stable and comfortable during exercise.

Seated Leg Curl

SM5023

Dimension: 1510*1255*1445 mm
Weight: 305 kg
Weight Stack: 138 kg

The DHZ SM5023 Seated Leg Curl is designed for focused hamstring training in a seated position. Adjustable back and thigh pads help users find a stable alignment, while the adjustable start range provides multiple setup options for different mobility levels and training preferences.

Triceps Extension

SM5028

Dimension: 1145*1050*1360 mm
Weight: 228 kg
Weight Stack: 95 kg

The DHZ SM5028 Triceps Extension supports focused arm training with a stable seated posture and guided extension movement. The angled seat and arm pads help users maintain upper-body control, while the pivoting handle structure adapts to different forearm lengths during exercise.

Biceps Curl

SM5030

Dimension: 1155*1075*1330 mm
Weight: 225 kg
Weight Stack: 95 kg

The DHZ SM5030 Biceps Curl provides guided arm curl training with angled arm pads for stable upper-arm support. The pivot and handle positions help support a comfortable wrist path, allowing users to focus on controlled biceps contraction through the movement.

Back Extension

SM5031

Dimension: 1220*1015*1330 mm
Weight: 280 kg
Weight Stack: 138 kg

The DHZ SM5031 Back Extension is designed for controlled posterior-chain and lower-back training. The adjustable start mechanism allows users to select a suitable movement range, while the lumbar pad and dual foot positions help support stable body alignment during exercise.

Seated Row

SM5034

Dimension: 1345*830*1960 mm
Weight: 295 kg
Weight Stack: 138 kg

The DHZ SM5034 Seated Row supports upper- and mid-back training through a guided pulling path. The overhead pivot helps create a smooth arc of motion, while multiple hand positions provide training variety and allow users to target different pulling angles.

Fixed Pulldown

SM5035

Dimension: 1565*1425*1865 mm
Weight: 305 kg
Weight Stack: 138 kg

The DHZ SM5035 Fixed Pulldown provides a defined pulling path for controlled back training and circuit-style strength areas. The angled seat and handle positioning help users maintain a stable exercise posture while performing repeated pulldown movements.

Multi Press

SM5084

Dimension: 1740*1450*1725 mm
Weight: 320 kg
Weight Stack: 138 kg

The DHZ SM5084 Multi Press combines multiple pressing movements in one selectorized station, supporting shoulder press, incline press and chest press setups through adjustable press-arm and seat positions. Its compact configuration helps facilities cover more upper-body training options without adding separate machines, while the guided movement path supports stable and controlled pressing performance.

Lat Pulldown / Low Row

SM5085

Dimension: 2100*1235*2275 mm
Weight: 290 kg
Weight Stack: 138 kg

The DHZ SM5085 Lat Pulldown / Low Row integrates two fundamental back-training movements into one space-efficient unit. With dedicated upper and lower belt positions, thigh support, footplates and separate handles, it allows users to perform vertical pulling and seated rowing exercises with consistent resistance and a stable training posture.

Hip Abductor / Adductor

SM5089

Dimension: 1705*625*1540 mm
Weight: 345 kg
Weight Stack: 138 kg

The DHZ SM5089 Hip Abductor / Adductor is designed for both outer- and inner-thigh training in a single selectorized machine. Adjustable leg pads and clearly defined start positions support smooth transition between abduction and adduction exercises, while the seated design helps users maintain a secure and controlled training position.

Biceps Curl / Triceps Extension

SM5087

Dimension: 1110*1075*1330 mm
Weight: 249 kg
Weight Stack: 95 kg

The DHZ SM5087 Biceps Curl / Triceps Extension provides two arm-training movements through an adjustable work arm and dedicated support pad. The curl and extension setups allow users to target the biceps and triceps with controlled alignment, making it a practical choice for commercial spaces that need complete arm training in a compact footprint.

Leg Extension / Prone Leg Curl

SM5090

Dimension: 1720*1040*1625 mm
Weight: 300 kg
Weight Stack: 110 kg

The DH2 SM5090 Leg Extension / Prone Leg Curl combines quadriceps and hamstring training in one dual-function unit. Users can switch between seated leg extension and prone leg curl setups with dedicated support pads and adjustable positioning, allowing lower-body isolation training to be completed efficiently within a single machine footprint.

DHZ

BENCHES AND STORAGE

SET UP YOUR PERFECT PERFORMANCE WORKOUT

The durable steel frame construction withstands the impact of high-intensity free weight and bodyweight workouts. A wide range of options includes Olympic stations, training stations, bodyweight stations, and storage solutions.

Flat Bench

SM-3001

Dimension: 1270*560*410 mm
Weight: 25 kg

The Flat Bench is a traditional flat bench that offers high-grade durability and quality.

Abdominal Board

SM-3002

Dimension: 1740*610*880 mm
Weight: 52 kg

A Decline Bench is a free weight bench that is angled downward to elevate the pelvis and lower the head, often with rollers to brace the feet. Abdominal crunch exercises work the muscles of the back and torso while upper body exercises performed with it work the lower portion of the Chest and Deltoids.

Incline Bench-30 Degree

SM-3003

Dimension: 1100*630*780 mm
Weight: 34 kg

The 30 degree incline bench features a fixed angle that provides proper positioning for multiple upper body exercises.

Incline Bench-55 Degree

SM-3004

Dimension: 890*550*1010 mm
Weight: 33 kg

The 55 degree incline bench features a fixed angle that provides proper positioning for multiple upper body exercises.

Utility Bench-75 Degree

SM-3005

Dimension: 1300*640*940 mm
Weight: 30 kg

The Utility Bench 75 Degree offers the functionality of a utility bench and a 75-degree curved footrest.

Decline / Abdominal Bench

SM-3006

Dimension: 1610*610*870 mm
Weight: 46 kg

The Decline/Abdominal Bench offers two workout options in one piece of equipment with the same high-grade durability and quality that comes with benches and racks.

Multi-Adjustable Bench

SM-3007

Dimension: 1330*560*470 mm
Weight: 39 kg

■ The Multi-Adjustable Bench has six different pressing angles and three seat pad adjustments to fit the needs of all your exercisers.

Adjustable Decline Bench

SM-3008

Dimension: 1630*720*940 mm
Weight: 60 kg

■ This decline bench offers multiple angle adjustments—from a mild decline for controlled pressing to a deeper angle for intensified abdominal and chest work. A simple lever system provides fast changes without makeshift solutions. Stable, comfortable, and built to support heavy lifting and focused core training.

Olympic Flat Bench

SM-3012

Dimension: 1330*1270*1270 mm
Weight: 66 kg

■ The Olympic Flat Bench offers an Olympic style flat bench press with the same high-grade durability and quality that comes with benches and racks.

Olympic Incline Bench

SM-3013

Dimension: 1300*1330*1480 mm
Weight: 90 kg

■ An Olympic style incline bench press with the same high-grade durability and quality that comes with benches and racks.

Olympic Decline Bench

SM-3014

Dimension: 1530*1350*1270 mm
Weight: 87 kg

The Olympic Decline Bench offers an Olympic style decline bench press with the same high-grade durability and quality that comes with benches and racks.

Barbell Rack

SM-3015

Dimension: 790*720*1530 mm
Weight: 65 kg

The Barbell Rack gives you convenient storage for 10 fixed barbells.
